Active Travel at KECHG

The traffic in Kings Heath at the start and end of the school day is often heavy with five secondary school plus a number of primary schools as well as through traffic.

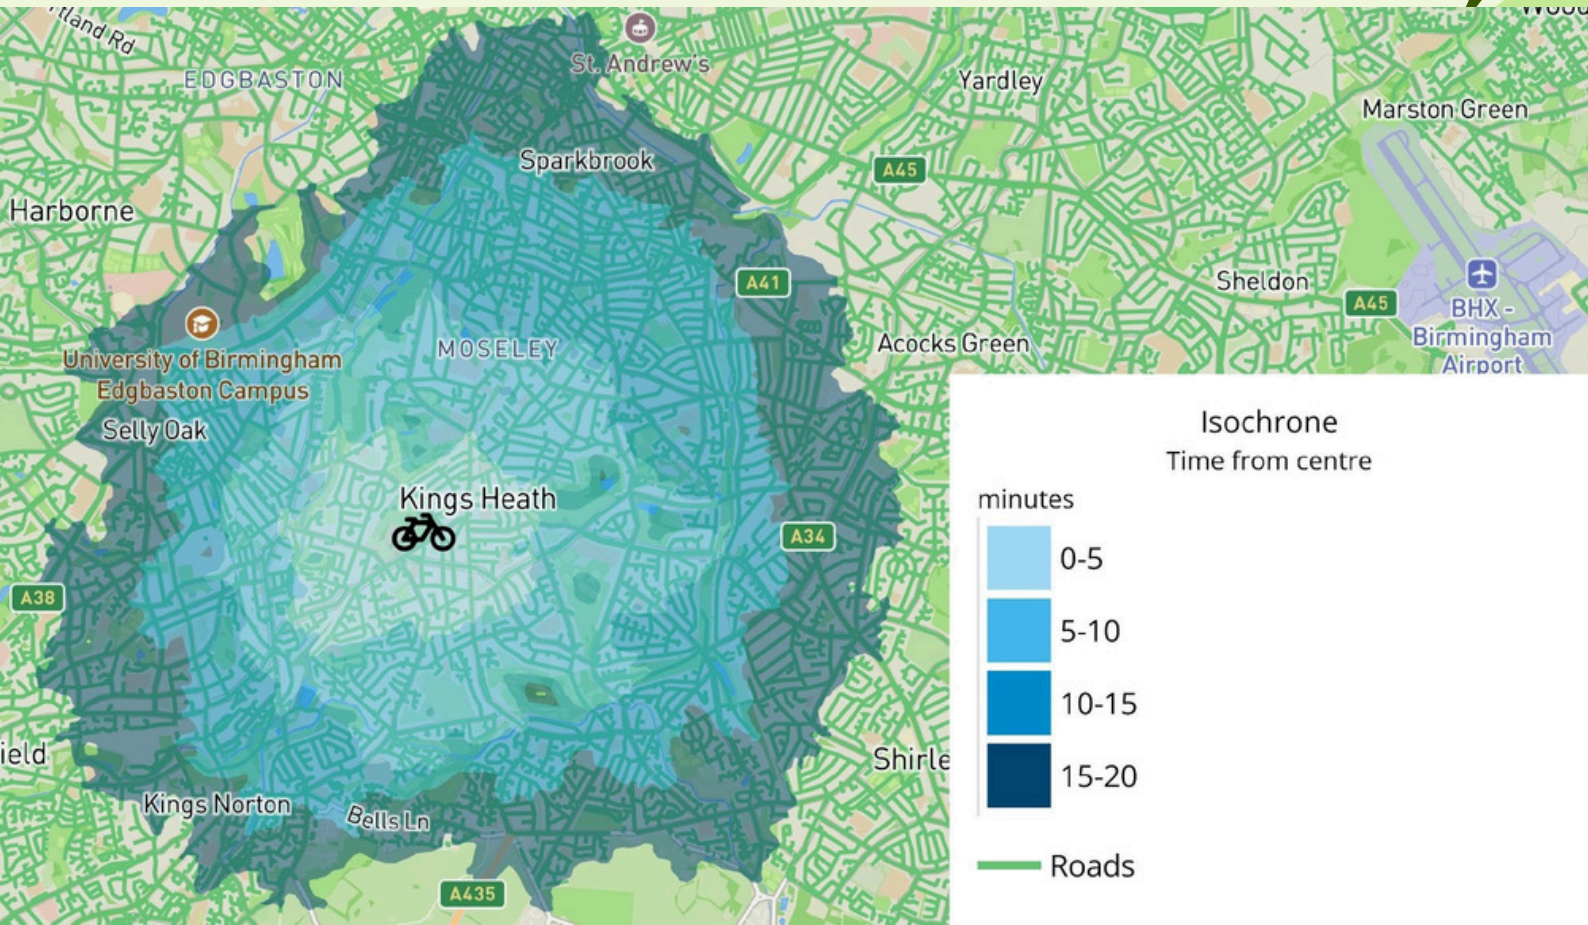

To improve air quality and safety for students see if there is somewhere on the map below you can drop your children off and allow them to walk the rest of the way.

The highlighted yellow areas are public car parks where students could be dropped off - walking even part the journey will allow them to exercise and spend time with friends.

Active Travel at KECHG

To encourage active modes of transport the school has plenty of bicycle storage available for those wanting to cycle to school. The Map below shows the areas less than 20 minutes from the school.

There are many areas that are easy to cycle through near the school, especially Kings Heath park, allowing time to exercise and unwind.
